

I would like to take a moment and tell everyone thank you so much for your contributions to the Youth Building Fund. A lot of things have already begun to take place. We have taken four rooms, removed some walls and made one large room capable of holding up to seventy five people. We have also removed all the original carpet that was installed in the youth facility back in the 70's. I'm excited about the carpet the G.J's have so kindly purchased for the youth. We have chosen to wait on having it installed till after we are finished painting, having the girls and boys restrooms built and the completion of the "aftershock" worship center. (This will be the room capable of holding up to 75 people).

Things are looking good but we still have a long way to go. I ask that you please continue to help as we try to finish this greatly needed project. Once again, thank you for everything you have already done. Maybe you have helped paint, install support beams in the ceiling, allowed us to use your trailers to take things to the land field, offered advice on how to approach this building project, or contributed to the building funds. We could never express how grateful and appreciative we all are.

Bro. Jeremy
